EDUCATION

Ontario College Diploma, Technical Methods in Orthotics / Prosthetics (2023 - 2025)

George Brown College

Honours BSc., Biophysics (2019 - 2023)

University of Toronto, St. George

AWARDS AND PRESENTATIONS

Technical Track Presenter

ISPO World Congress, Stockholm, Sweden (2025)

"The Use of Organic Matter in an Aesthetic Finish for Laminated Prosthetic Devices"

Presenter

OAPO Technical Symposium (2025)

"The Use of Organic Matter in an Aesthetic Finish for Laminated Prosthetic Devices"

Karl Ruder Scholarship

George Brown College (2024)

Granted to technical students in their first year of study who demonstrate active involvement in the community and commitment to working with others in their field.

RELEVANT EXPERIENCE

Prosthetic Technical Student

Ron Joyce Children's Healthcare Centre (2025)

- Applied problem-solving skills to fabricate prosthetic devices with appropriate dimensions and specifications.

Junior Orthotic Technical Assistant

Boundless Biomechanical Bracing (2024 - 2025)

- Efficiently filled and duplicated plaster positives for clinical / technical use, trimmed and buffed orthotic trimlines, assisted in draping, and fabricated heel lifts, growth plate extensions, straps, and pads as required.
- Monitored and replenished clinical and technical supplies within the facility as required, notified supervisors of low stock, and created and updated tracking spreadsheets for continuity.
- Thoroughly inspected, sanitized, and restocked patient consultation rooms to ensure efficient clinical workflow.

Prosthetic Technical Student

Ottobock Canada (2024)

- Fabricated and assessed prosthetic liners and upper extremity trial devices using HTV and RTV silicone.
- Developed proficient skills in custom colour mixing, matching, and selection for cosmetic silicone devices.
- Duplicated, filled, and prepared plaster casts for prosthetic device fabrication in a timely and efficient manner.

Prosthetic and Orthotic Laboratory Assistant

George Brown College at SCIL, Sunnybrook Health Sciences Centre (2024)

- Proficiently performed thermoforming and fabrication of prosthetic and orthotic negative molds using a variety of thermoplastics and draping techniques.
- Accurately duplicated plaster positives and created negative orthotic molds using given measurements.
- Organized and created kits containing necessary prosthetic locks and orthotic joint systems and their molding dummies for future clinical and technical students.
- Conducted thorough inspections of laboratory organizational systems to identify and implement areas of improvement.
